ELECTRIC
FRENCH DESIGN
REAL FLAME

It is easy to understand the allure of a fireplace.

Providing warmth, ambience, and a mood of relaxation and calm, a fireplace can raise the character of any residential or commercial space. They can improve the look and feel of any room as a decorative feature or provide a supplemental heating source that helps reduce energy costs. If chosen with care, a fireplace can become the centrepiece of a memorable interior design, and add significant value to a property.

Versatile Visuals to suits all spaces

However, installing a traditional gas or wood fireplace is sometimes not achievable due to lack of access to fuel, cost of installation, or other factors. With their realistic flame effects and advanced features, Real Flame's electric fireplaces are making the ambience of flame accessible to all consumers – homeowners, renters, and commercial clients alike.

Effective and efficient heating

Real Flame's electric fireplaces are market leading in terms of visual appearance, design, and heating technology; resulting in a lower cost, green, functional, and stylish option. All Real Flame electric fireplaces can be operated without heat, providing a relaxing flame effect year-round for minimal cost.

Real Flame's patented technology

The patented Revillusion®, Opti-V, and Optimyst flame effects are unique in the market. From linear, to portrait, to double-sided configurations, the Real Flame range offers endless possibilities to create a stunning feature in your space.

VIVENTE 750|1000|1500

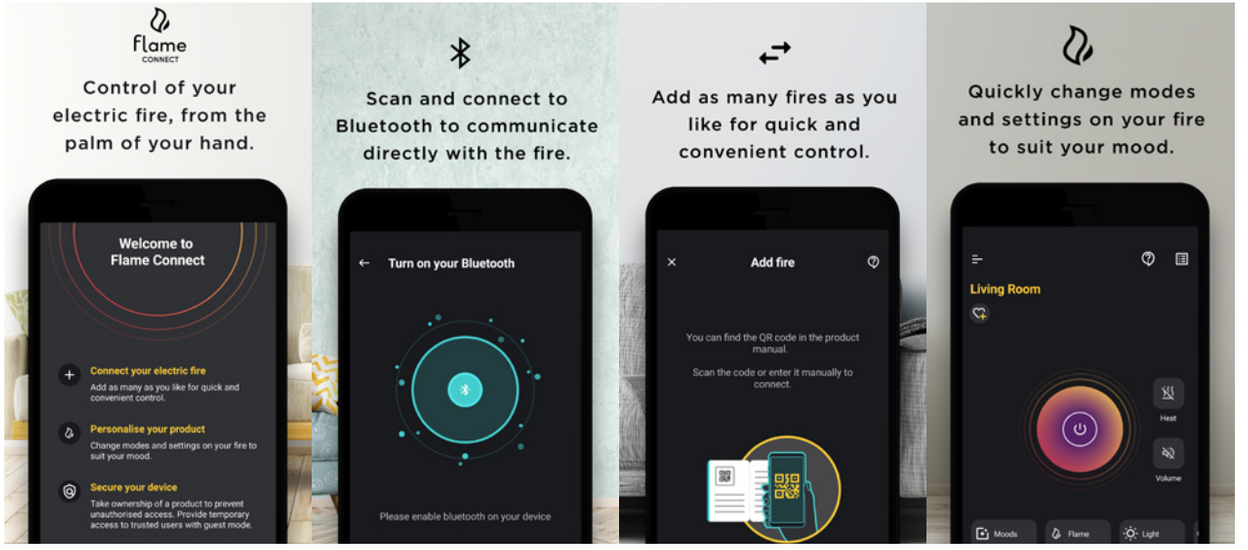
FLAME CONNECT APP



Flame Connect is a new app that places full control of your electric fire into a beautiful, easy and convenient interface, all from the palm of your hand. The app is available on Android and iOS.

Simply scan the QR code on the installation manual and connect to Bluetooth to communicate directly with your fire

Prevent unauthorised product access by linking ownership of your fire with your account

Quickly change modes and settings on your fire to suit your mood

Set product schedules to automate your fire's on/ off times

Customised flame effect settings and LED colours

Enable guest mode for temporary access to other Flame Connect trusted users

Support for multiple languages and a choice of Fahrenheit and Celcius readout
